

PRODUCTION HISTORY WORKSHEET

Instructions: Fill out as much of the information on this Production History Worksheet as possible for your **agriculture production during 2008**. In order to be considered an agricultural producer there must be an annual minimum of \$1,000 of agricultural products produced and/or sold from the operation. If there were reasons beyond the producers control (i.e. climatic conditions such as drought) to meet this \$1,000 annual minimum then documentation must verify that the \$1,000 minimum has been met two of the last five years. For applicants in their first year of agricultural production once \$1,000 of agricultural products are produced or sold they are considered eligible producers

Forest Producers: Please complete Forest Management sections

An acceptable form of proof of documentation may be an IRS form 1040 Schedule F, or other accounting records certified by a tax preparer, that shows profit or loss from farm operations.

Please check if you are a Limited Resource Farmer.

Please Note: This needs to accompany your EQIP or AMA 2010 Application.
